

CC3R

Coin Recycler

ARCA  Retail

CC3R

Enter the retail game changer.

Speed Things Up

Shift changes can significantly slow your cash-related process—but it doesn't have to be that way. Designed to speed things up and make those processes more efficient, the ARCA CC3R is a retail game changer.

The fastest and most efficient coin recycler in the world; the CC3R is an excellent solution for unproductive back office processes. Eliminate lost time and increase your labor savings.

Design in the Details

The CC3R Coin Recycler allows multiple users to simultaneously withdraw and deposit coin from separate access points, removing the end-of-shift waiting that typically occurs.

This technology revolutionizes start-of-day processes by having a convenient input location for the cash till drawer, eliminating coin transferal between containers. Designed with an eye to cure common retail pain points, cost savings are immediate.
