

ARCA OM61

OEM Cash Recycler

ARCA OM61

The final piece of your back office cash solution.

The Recycler You Need

The OM61 is a freestanding cash recycler with additional deposit capacity designed to integrate easily into back office cash solutions for retail, commercial banking and cash-in-transit (CIT) companies.

Once integrated with your cash automation software, this dual function recycler can prepare cashier tills at the start of the day and receive the cash from the tills at the end of the day— without management supervision.

The Features You Want

As a cash recycling machine, the OM61 can accept and dispense bundles of banknotes and store them securely inside its UL or CEN certified safe. In response to the needs of leading CIT companies, the OM61 offers

the unique feature of a separately secured deposit compartment. Notes in the separate compartment are stored in sealed, tamper-evident bags for quick access by CIT operators.
