Arca C2000
Back Office Coin
Recycler

ARCA
A SESAMI COMPANY

Arca C2000
Right-sized coin management.

The Product

The Arca C2000 coin recycler automates coin management, allowing retailers to minimize time-consuming coin handling. The Arca C2000 'recycles' the coin you take in by allowing you to reuse it in your tills.

At the beginning of a shift, coins are automatically counted and dispensed directly into the cash drawer tray for each denomination – according to the assigned starting amount for each cashier or register.

At the end of a shift, coins are emptied from the cash drawer directly onto the Arca C2000's large feed surface and precisely counted, sorted and stored – ready for the next dispense.

Features

The Arca C2000 helps you maintain a steady inventory of sorted coin in your store meaning fewer coin orders. It supports up to 10 registers per day, ideal for small/medium sized retail locations.

Arca Control's touchscreen interface lets cashiers quickly withdraw or deposit coins with just a few simple touches. Store Managers can also quickly reload low-capacity denominations using the same intuitive interface.

Tracking the Arca C2000's available coins is also simple using Arca Insight on the web. Just login and view the cash position of your recycler for each denomination – so you never get caught without enough coins to get through your day.

US Specifications

- 5,500 coin capacity
- Holds 1500 pennies, 1000 nickels, 2100 dimes, 900 quarters
