

Genmega SCDU-E Cash Dispenser

Genmega SCDU-E

Highly compatible design and flexible capacity in one simple device.

Built to fit

The Genmega SCDU cash dispenser has an industry standard form factor designed to fit easily into most self-service cash handling kiosks. Deployed in ATMs all over the world, the SCDU has proven reliability for moderate transaction demands.

The dispenser can be configured for use with one to four denominations, contained in securely locked 1000-note cassettes for a capacity of up to 4000 banknotes in a compact unit. Currency cassettes are easy to load for fast cash replenishment and accommodate the majority of banknotes in the world with minimal adjustment.

Easy Integration

Banknotes are presented in long-edge-first orientation from the SCDU, using “spray” method to dispense. The dispenser module is designed for standard front-service integration, with dispensed notes and cassette access on the same side of the unit.
